The AMOS Demo Day

- The demo day is the final day of the course
 - The demo day is organized as a **fair** (“Messe”)
 - Student teams show the results of their project
 - Audience are industry partners and fellow students
- After the opening, everything runs in parallel

AMOS Demo Day Time-Line

| Time | Agenda / Tasks |
|-------------|-------------------------------------|
| 09:00-09:45 | Set-up of presentation booth |
| 09:45-10:15 | Welcoming of industry guests |
| 10:15-10:20 | Welcome address by Prof. Riehle |
| 10:20-10:30 | One slide presentation by each team |
| 10:30-12:30 | Demos and photo op at team booths |
| 12:30-14:00 | Clean-up of presentation booth |

One Slide for Each Project / Team

- The slide will be shown during opening remarks, contains:
 - One paragraph (better: one sentence) about the project goal
 - Three logos: Team logo, industry partner logo, FAU logo
 - Optional: Some identifying visual (screenshot, photo of object, ...)
- Delivery format: Screen format (16:9), print to PDF

Presentation Booth

- Student teams are given “a booth”
 - This is a presentation table and pinboards for posters
 - Students demo their work at this table
 - Students explain their work using two posters
 - Students can create additional materials (e.g. slides)

Two Posters for Each Team

- One poster on product management, suggested content
 - Project and team name, team logo
 - Short project description
 - Key use cases
- One poster on software development, suggested content
 - Software architecture
 - Employed technology
 - Tooling and processes

Personalfragebogen 2.0* is a personal data management software solution, supporting companies of any size in hiring new employees more efficiently.

The product improves the hiring process by automating the collection of personal data during the hiring procedure, and provides aid in managing the collected data.

Demo Day
**Friedrich-Alexander Universität
Erlangen**
Wednesday, 15 July 2015 10.15-11.45

*Personalfragebogen 2.0 is a joint project between FAU's OSR Group and DATEV eG.

Personalfragebogen 2.0

Personnel Questionnaire Automation

Software Architecture

Technology

| Name | Function |
|--------------------------|--------------------------------|
| Spring Framework (4.1.6) | Java based Web Framework |
| Java SE (7u79) | Fundamental Platform |
| HTML5 | Client-side core technology |
| Selenium (2.45.0) | UI Testing/Integration Testing |
| JUnit (4.12) | Java Unit Testing Framework |
| Hibernate ORM (4.3.9) | ORM System for persistence |
| PostgreSQL (9.4.1) | Database Management System |
| Tomcat 7.0.61 | For local deployment |

*Personalfragebogen 2.0 is a joint project between FAU's OSR Group and DATEV eG.

Use of Corporate Identities

- Please use FAU logo
- Please use your team logo
- Please use industry partner logo, but ask first

CroudTrip!

sponsored by Elektrotbit

The CroudTrip! application wants to revolutionize the car-ride-sharing market with its easy, user-friendly and highly automated way of organizing shared Trips!

The Product

- Offer and join shared Trips at short-notice!
- For drivers: Easily find passengers on the way you are going anyway ... and earn money with it!
- For passengers: Reach your destination comfortably!
- We will automatically match you to the best offer in real-time!
- Simply check-in and check-out of your Trips using NFC on your device!
- No direct Trips? No problem - Join a SuperTrip! with multiple drivers!

The Concept

SuperTrip!

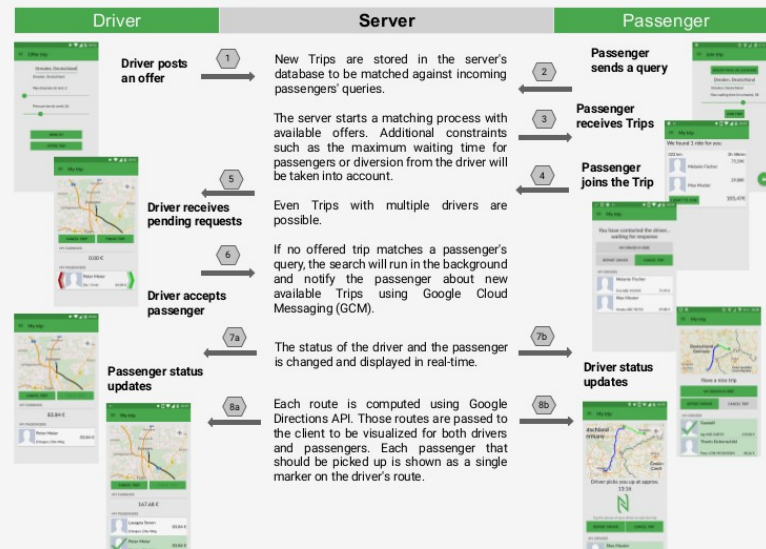

- Combine multiple offered routes to serve passengers even if there is no direct connection available
- Find routes which can pick up a passenger from his start position or drive to his final destination
- Subdivide those routes, compute the closest pair of those waypoints and use it as a "connection point"
- If the distance of the closest pair is too large, start a recursive matching process with these two waypoints

Multiple Passengers

- Match multiple passengers with one driver who will pick them up and bring them to their destinations in an optimal order
- Optimal order is constrained by given internal order of each waypoint pair, because each passenger has to be picked up before the driver reaches his destination location
- Compute optimal order by solving the Travelling Salesman Problem via Brute Force (max. 4 passengers)

The Interactions

The Process

Total Messages
27% #channels, 1% groups, 72% DMs

- Total # of story points: 370
- Development Speed: 30.9
- 13.23% of total effort used for bugfixing

- Slack as main communication tool
- Integrations for Travis CI, Github and Crashlytics

- Total # of Commits: 727
- Lines of Java Code: 15362
- Lines of Comments: 3938

The Sponsor

The University

Presentation Table

- Mandatory
 - Bring a laptop to demo your project
 - Bring anything else necessary
- Optional
 - Be creative, do what works!
 - The goal is to explain your project

Demo Preparation

- Dos
 - Have a clean user interface
 - Use domain terminology and examples
 - In the user interface (labels, titles)
 - In the stories you tell
 - Have a story to tell, for example,
 - A day in the life of ...
 - A workflow example
 - Make the demo (data) re-entrant
 - You will have to start over several times
 - Always want to start at the same point
- Don'ts
 - Use “test” or “help” as labels
 - Not follow the advice on the left

Demo Execution

- Have two people at the booth
 - One talks to people in general
 - One demos to people

Thank you! Questions?
